13. Common Problems & Solutions

1. What This System Is & How It Works

This system keeps all the records of your fertilizer business in one place. You no longer need to keep accounts on paper — everything is calculated automatically.

You simply fill in a small form (on your phone), and the system automatically:

- Records your sales
- Records raw material purchases
- Tracks production
- Tracks investments
- Manages ACI Company bills and payments
- Shows how much money is owed and how much profit you have made
- Sends you important updates on Telegram

The most important point: You never need to touch the spreadsheet or its formulas. You only fill in forms — the system does the rest.

The Workflow (in simple terms)

Suppose you sell some fertilizer today. You would:

1. Open the "Sale" form on your phone
2. Enter the customer name, quantity, and amount
3. Press "Submit"

That's it. The system then calculates everything, updates the dashboard, and sends a Telegram message.

2. Before You Start

The Three Main Parts

There are three parts to this system that you will use:

Part	What it is for
Forms	Entering new data (sales, purchases, etc.)
Dashboard	Seeing the whole business at a glance
Telegram	Getting important updates on your phone

What You Need

- A smartphone (Android or iPhone)
- An internet connection
- The form links (save them once and reuse)
- The Telegram app (to receive alerts)

Tip: Save the form links to your phone's home screen or bookmarks, so you can open them quickly every time.

3. How to Enter Data (Google Forms)

Whatever happens in your business, you record it by filling in a form. There are six forms in total — each for a different purpose.

How to Fill a Form (same for all forms)

1. Tap the link for the form you need
2. The form opens on your phone
3. Type or select the correct information in each field
4. Tap "Submit" at the bottom
5. When you see "Your response has been recorded," the entry is saved

Remember: Always enter the Date correctly, because the Monthly Report uses the date to group records. A wrong date means a wrong report.

What You Do NOT Need to Enter

The system calculates some values for you, such as:

- Total weight (in kg) — multiplied automatically
- Total price — calculated automatically
- Amount due — subtracted automatically
- ID number — assigned automatically

So you don't need to worry about these. You only provide the basic information.

4. The Six Forms in Detail

Form 1: Sale Form

Fill this in whenever you sell fertilizer.

What you enter	Meaning / Example
Date	The day of the sale
Customer Name	Buyer's name (e.g. Karim Store)
Address	Buyer's address (e.g. Savar)
Product	Select Organic Fertilizer
Pack Size (kg)	Packet size — 1, 5, or 40
Quantity	How many packets sold
Rate	Price per kg
Collection	How much the customer paid now

Example: 10 packets of 40 kg at ₳30 per kg, customer paid ₳12,000. The system calculates: 400 kg total, ₳12,000 total price, ₳0 due.

Form 2: Raw Material Form

Fill this in when you buy raw materials (chicken litter, cow dung, etc.).

What you enter	Meaning / Example
Date	Day of purchase
Supplier Name	Who you bought from
Product	Which raw material (select from list)
Bag Weight (kg)	Weight of one bag
No. of Bags	How many bags
Total Amount	Total cost
Payment	How much you paid now

Raw material list: Chicken Litter, Cow Dung, Tricoderma, Molasses, Vegetable Wastage.

Form 3: Production Form

Fill this in when you make fertilizer and pack it into 40 kg bags.

What you enter	Meaning / Example
Date	Day of production
Bags Produced (40kg)	How many bags you made (40 kg each)
Note	Any comment (optional)

Example: You made 15 bags today. The system calculates = 600 kg.

Form 4: Investment Form

Fill this in when you put money into the business (shop rent, machinery, vehicle, etc.).

What you enter	Meaning / Example
Date	The day
Item Name	What the money is for (e.g. shop rent)
Type	Select Current or Permanent
Value	Amount of money

Current = regular monthly expense (like rent). Permanent = one-time large expense (like a vehicle or machine).

Form 5: ACI Activity Form

This form is for work with ACI Company. There are three types of activity:

- Received — ACI gave you empty packets
- Filled — you filled packets with fertilizer
- Delivered — you sent filled packets to ACI

What you enter	Meaning / Example
Date	The day
Activity	Select Received / Filled / Delivered
Quantity	How many bags
Note	Comment (optional)

Form 6: ACI Bill Form

This form is for billing ACI and recording their payments. Two types of action:

- Bill Submitted — you submitted a bill to ACI
- Payment Received — ACI paid you

What you enter	Meaning / Example
Activity	Bill Submitted / Payment Received
Bill No.	Bill number (e.g. ACI-001)
Date	The day
Tons	How many tons (usually 50) — only when submitting a bill

Important: When recording a payment (Payment Received), just enter the bill number correctly. The system will find that bill and mark it Complete automatically.

5. How to Read the Dashboard

The Dashboard is the "mirror" of your business — it shows the whole picture at a glance. It is the first thing you see when you open the file.

You don't need to enter anything on the Dashboard — it updates by itself. You only look at it.

Top Cards (KPI Cards)

Card Name	What it shows
Total Sales	Total value of all sales
Customer Due	How much customers still owe you
Fertilizer Stock	How much fertilizer is in stock (kg and bags)
Total Investment	Total money invested in the business

Warning Cards

Card Name	What it shows
Low Stock Alert	Red warning if fertilizer is running low
ACI Progress	Tons delivered to ACI and progress toward the next bill
Supplier Due	How much you owe your suppliers

Low Stock Alert: Green "STOCK OK" means you have enough fertilizer. Red "LOW STOCK" means stock is low — time to produce more.

Charts

- Monthly Sales Trend — how much you sold each month
- Sales by Pack Size — which packet size (1/5/40 kg) sells most
- Production vs Sales — how much you produced, sold, and have left
- Raw Material Breakdown — how much was spent on each raw material

Tables & Information Below

- Recent Sales — your latest 5 sales
- Alerts — all warnings in one place (red = problem, green = OK)
- ACI Live Summary — all ACI-related figures
- Estimated Profit — approximate profit (red if it is a loss)

Don't worry if Estimated Profit is red. If you made a large investment in a month (e.g. buying a vehicle or machine), profit may temporarily look low. As sales grow, it will turn green.

6. Overview of All Sheets

The system has several sheets. You don't need to touch them — this is just so you know what each one does.

Sheet Name	What it contains
Dashboard	Summary of the whole business (you'll look at this most)
Sale	List of all sales
Raw Material	List of all raw material purchases
Production	List of fertilizer produced
Investment	List of all investments
ACI Company	ACI activity and billing list
Monthly Report	Month-by-month figures
Settings	System settings (do not edit)

Caution: Do not type or delete anything in the Settings sheet or in cells that contain formulas. This can break the calculations. Always enter data through the forms.

7. Each Sheet in Detail (Column by Column)

This chapter explains every column in each sheet — what it means, and whether you fill it in or the system calculates it.

In the tables below, "You enter" means you provide this in the form. "Automatic" means the system calculates it — you do nothing.

Sheet 1: Sale

Column	Meaning	Source
ID	Serial number of the sale	Automatic
Date	Date of sale	You enter
Customer Name	Buyer's name	You enter
Address	Buyer's address	You enter
Product Name	Product (Organic Fertilizer)	You enter
Pack Size	Packet size (1/5/40 kg)	You enter
Quantity	Number of packets	You enter
Weight Sold	Total weight (packets × size)	Automatic
Rate	Price per kg	You enter
Total Price	Total amount (weight × rate)	Automatic
Collection	Amount the customer paid	You enter
Due	Remaining balance (total – paid)	Automatic

Example: 10 packets of 40 kg × ₺30, customer paid ₺12,000 → Weight Sold = 400 kg, Total Price = ₺12,000, Due = ₺0.

Sheet 2: Raw Material

Column	Meaning	Source
ID	Serial number	Automatic
Date	Purchase date	You enter
Supplier Name	Supplier's name	You enter
Product Name	Which raw material	You enter
Bag Weight	Weight of one bag (kg)	You enter
No. of Bags	Number of bags	You enter
Total Weight	Total weight (bags × weight)	Automatic
Total Amount	Total cost	You enter
Payment	Amount paid now	You enter
Due	Remaining balance (total – paid)	Automatic

Example: 40 bags of 50 kg cow dung, total ₺60,000, paid ₺30,000 → Total Weight = 2,000 kg, Due = ₺30,000.

Sheet 3: Production

Column	Meaning	Source
ID	Serial number	Automatic
Date	Production date	You enter
Bags Produced	How many bags made (40 kg each)	You enter
Total Weight	Total weight (bags × 40)	Automatic
Note	Comment (optional)	You enter

Example: 15 bags produced → Total Weight = 600 kg. Sales and ACI deliveries are taken from this stock.

Sheet 4: Investment

Column	Meaning	Source
ID	Serial number	Automatic
Date	Date	You enter
Item Name	What the money is for	You enter
Type	Current or Permanent	You enter
Value	Amount of money	You enter

About "Type":

- Current = a regular monthly expense (e.g. shop rent, packaging)
- Permanent = a one-time large expense that lasts a long time (e.g. vehicle, machine)

Example: Shop rent ₺15,000 → Type is Current. Delivery van ₺800,000 → Type is Permanent.

Sheet 5: ACI Company

This sheet has two parts: ACI activity, and ACI billing.

Part 1 — Activity

Column	Meaning	Source
ID	Serial number	Automatic
Date	Date	You enter
Activity	Received / Filled / Delivered	You enter
Quantity	Number of bags	You enter
Note	Comment (optional)	You enter

Part 2 — Billing

Column	Meaning	Source
Bill No.	Bill number	You enter
Date Completed	Date the bill was submitted	You enter
Bill (₺)	Bill amount (50 tons × ₺5,900)	Automatic
Payment Status	Pending or Complete	You enter
Due Date	Last date to receive payment (+45 days)	Automatic
Days Left	How many days remain	Automatic

The full ACI rules are explained in Chapter 11. Remember — when 50 tons are reached, the system notifies you on Telegram automatically.

8. The Monthly Report

This sheet lets you see the full figures for any single month — for example, how much you sold, spent, and earned in June only.

How to Use It

1. Go to the Monthly Report sheet
2. At the top, next to "Select Month," there is a box
3. Tap that box — a list of months appears (e.g. June 2026)
4. Choose the month you want to see
5. The whole report updates to show that month's figures

The report shows:

- That month's total sales, collection, and dues
- That month's raw material purchases
- That month's production
- That month's investment
- That month's ACI figures
- That month's estimated profit

Convenience: Even in July you can view June's figures. Just change the month — the figures update by themselves. Any past month can be viewed at any time.

9. Generating PDF Reports

You can export any month's figures as a PDF file. These PDFs are saved in your Google Drive — a permanent record, like a paper ledger.

How to Generate a PDF

1. In the menu at the top, click " PDF Reports"
2. Choose the sheet you want (e.g. Sale)
3. Then choose the month:
 - This Month — the current month
 - Last Month — the previous month
 - Choose Month — any month (e.g. type 2026-06 for June)
4. After a moment, a "PDF created" message appears
5. Open Google Drive and find the PDF in the "Organic Fertilizer Records" folder

How the folders are organized:

- Sale folder — all sales PDFs
- Raw Material folder — all raw material PDFs
- Production, Investment, ACI Company — separate folders each
- ACI Billing — separate folder for ACI bills

Example: If a bank or accountant asks for "June sales records," you can click PDF Reports → Sale → Choose Month → 2026-06 and produce the PDF instantly.

10. Telegram Alerts

The system sends important updates to your Telegram, so you don't have to keep opening the file to check.

Alerts You Will Receive

Alert	When it arrives
 New Sale	Whenever a sale is made
 New Raw Material	Whenever raw material is purchased
 New Production	Whenever fertilizer is produced
 Low Stock	When fertilizer is running low
 ACI Bill Ready	When 50 tons is reached
 Customer Due	On the 1st of each month
 Supplier Due	On the 1st of each month
 ACI Payment Due	When 7 days remain on a bill

These messages remind you when to collect money, when to produce more, and when to receive payment from ACI — so nothing is ever forgotten.

11. Working with ACI Company

ACI Company is a special customer. Its accounting works a little differently. Here is a simple explanation.

The Steps of Working with ACI

1. ACI gives you empty 40 kg packets (record this with the Received form)
2. You fill those packets with your own fertilizer (record this with the Filled form)
3. You send the filled packets to ACI (record this with the Delivered form)

Billing Rules

- ACI does not accept a bill until at least 50 tons
- Price: ₺5,900 per ton ($6.10 - 0.20 \text{ VAT} = ₺5.90 \text{ per kg}$)
- ACI pays the bill within 45 days

When 50 tons (1,250 bags) of delivery is reached, the system notifies you on Telegram: "🚚 ACI Bill Ready." Then you:

1. Submit the bill to ACI
2. In the ACI Bill form, select "Bill Submitted" and enter the bill number and date
3. After 45 days, when ACI pays, select "Payment Received" in the same form and enter the bill number

The system keeps track of the 45-day window and reminds you when 7 days remain. So you never forget to collect a payment.

12. Glossary (What the Words Mean)

The system uses some English business terms. Here is what they mean in simple words.

Word	Meaning
Sale	Selling fertilizer
Raw Material	The ingredients used to make fertilizer
Production	Making the fertilizer
Investment	Money put into the business
Stock	What you have in the warehouse
Dashboard	The summary screen
Customer	Buyer
Supplier	Who you buy raw materials from
Due	Outstanding / unpaid amount
Collection	Money received
Total Amount	Total money
Payment	Money paid out
Quantity	Number / amount
Rate	Price per kg
Weight	Weight
Bags	Sacks / packets
Pending	Waiting / unpaid
Complete	Done / paid
Delivered	Sent / handed over
Bill	Invoice
Estimated Profit	Approximate profit
Alert	Notification / warning

13. Common Problems & Solutions

Problem: After submitting a form, it doesn't show on the Dashboard

Solution: Wait a few seconds, then refresh (reopen) the file. It usually updates almost immediately.

Problem: No messages are arriving on Telegram

Solution: Make sure you have an internet connection and that you have pressed "Start" on the bot in the Telegram app at least once.

Problem: I entered wrong information

Solution: Don't worry. Contact the developer — they can go into the sheet and correct it. It is best not to edit the sheet yourself.

Problem: The Due amount looks wrong

Solution: This usually happens if the Collection field was left empty. Always enter how much the customer paid when recording a sale.

Problem: The Monthly Report looks empty

Solution: Check that you selected the correct month at the top. A month with no data will appear empty — this is normal.

For any problem you cannot solve, contact the person who built this system. They will help.

— Best wishes for your business —
